# GLOSSARY

1. **INVENTORY:** relies on taking of very accurate dimensions from all over design space.

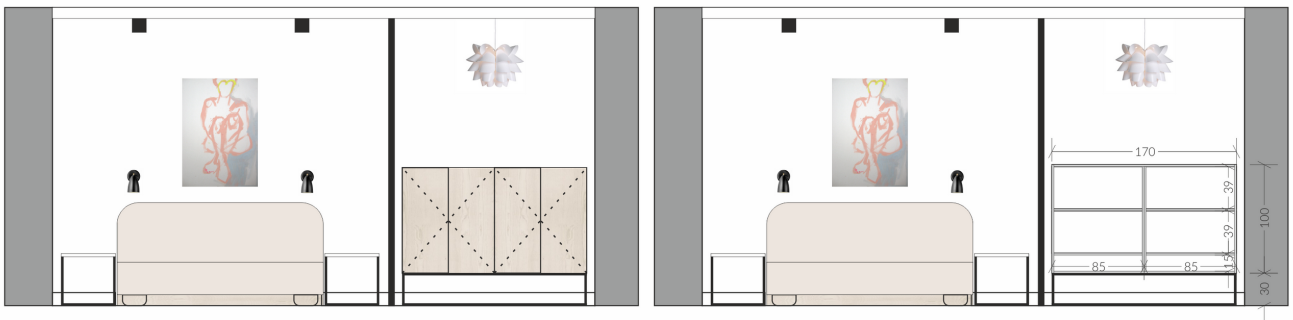

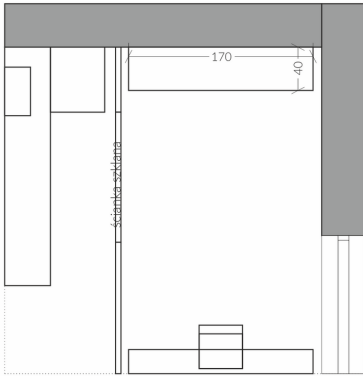

2. **FUNCTIONAL LAYOUT:** finding the best places in space for rooms and things (including the technical capabilities of the building).

The preparation of the functional system is preceded by an in-depth analysis of the investor's needs and preferences. Example (before and after cooperation with me):

# GLOSSARY

3. TECHNICAL DESIGNS: design of suspended ceilings, arrangement floors, technical designs for electrics, plumbing and possibly c.o. and expanding selected walls. An example of developing a wall in a bedroom:

4. 3D VISUALIZATIONS: a combination of colors, structures, materials and objects to show the whole composition. In three dimensions. Example:
